Fax 02 93901522

The directive 2002/96/CE dated 27/01/03 ("WEEE") applies to low voltage products, listed in annex IA. That directive wants to avoid, reduce, reuse as well to recycle electrical and electronics old units. Stationary machines and their components and assemblies which are not independent units are exemptions for this directive. Our products fulfil at least one of these mentioned facts, therefore they are not concerned in WEEE directive.

The European Union issued the directive 2002/95/CE ("RoHS") to reduce the use of certain hazardous substances in electrical and electronic equipment. This directive is valid for the EU member states.

All our products fall under the exemption which applies to **product category 9 "electronic equipment"**; because they are considered components of a stationary machine.

Lika Electronic • Via S. Lorenzo, 25 • 36010 Carrè (VI) □ Italy

Even if we are not binding with these directives, conscious about the importance of the environmental protection and the preservation of the natural resources, we are committed to guarantee that our products gradually comply with the above mentioned directives.

For this reason, at the end of 2004 we planned the below activities in order to restrict the use of hazardous substances in our products.

**2005:** Start of "RoHS-activities"; purchase of compliant parts and redesign of circuits

**Jan. 2006:** 90% of all LINEPULS & ROTAPULS products to be RoHS/WEEE compliant

**May 2006:** 90% of ROTACOD, DRIVECOD & POSICONTROL products to be RoHS/WEEE compliant

**Dec. 2006:** all catalogue products to be RoHS/WEEE compliant except running out products\*

\* an updated list of running out products, customer specific designs and products not subject to a redesign will be available on our web site.

We will not mark our compliant products with "WEEE" and "RoHS" logos. Customers can recognize a conform product from the date it has been introduced on the market. The serial number on each product label contains the date of manufacturing.

eg. **0545xxxxx**

"0545" year 2005, week 45 / "xxxxx" progressive serial no. of that week.

July 2006

## DIRECTIVES 2011/65/EC (RoHS II) and 2002/96/CE (WEEE)

The directive 2002/96/CE dated 27/01/03 ("WEEE") applies to low voltage products, listed in annex IA. That directive wants to avoid, reduce, reuse as well to recycle electrical and electronics old units. Stationary machines and their components and assemblies which are not independent units are exemptions for this directive. Our products fulfil at least one of these mentioned facts, therefore they are not concerned in WEEE directive.

In June 2011 the European Union issued the new directive 2011/65/EC ("RoHS II"), replacing the previous one 2002/95/EC (RoHS I) on the restriction of the use of certain hazardous substances in electrical and electronic equipment. This directive is valid for the EU member states.

The new Directive 2011/65/EC deals with the same hazardous substances and the same maximum concentration limit as RoHS I, but is expanded to previously excluded categories.

Therefore, conscious about the importance of the environmental protection and the preservation of the natural resources, we are committed to guarantee that our products comply with the above mentioned directives.

For this reason, we implemented all due activities in order to restrict the use of hazardous substances in our products.

Not all our compliant products will be marked with "WEEE" and "RoHS" logos. Customers can recognize a conform product from the date it has been introduced on the market.

The serial number on each product label contains the date of manufacturing.

eg. **1509xxxxx**

"1509" year 2015, week 9 / "xxxxx" progressive serial no. of that week.

February 2015
